eGoldFax

Pure Cloud Faxing for Sharp OSA Cloud-Ready MFPs
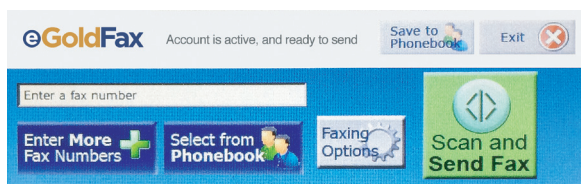

Easy, inexpensive faxing—without the fax boards or phone lines!

SHARP®

OSA®
Sharp Open Systems Architecture

- **No hardware or software to install—pure, cloud-based faxing**

- **Unlimited fax users and devices, and no inbound fax busy signals**

- **Doesn't require a costly fax phone line or MFP fax hardware**

eGoldFax Pure Cloud Faxing™ is a cloud service for Sharp OSA® 4x cloud-ready multi-function printers (MFPs) that enables you to easily fax from Sharp MFPs. **eGoldFax** even lets you send and receive faxes through your email.

MFP TOUCH PANEL

eGoldFax — Account is active, and ready to send — Save to Phonebook — Exit

Enter a fax number

Enter **More** Fax Numbers | Select from **Phonebook** | Faxing Options | Scan and Send Fax

With **eGoldFax**, you won't be burdened with upfront costs. There's no MFP fax hardware, no on-site fax telephone lines or telephone system integration, and no hardware or computer software to install. Getting up and running is simple and straightforward. In fact, you can be sending and receiving faxes with **eGoldFax** in as little as five minutes. So choose the modern faxing solution– **eGoldFax** – and avoid the expense and hassles of traditional fax hardware and software.

More eGoldFax Features and Benefits

- Unlimited users
- Unlimited eGoldFax-enabled Sharp and scan-to-email MFPs
- No busy signals—never miss an inbound fax
- Fax to and from your email, and receive faxes via email or auto-print to Sharp MFP
- Keep your existing fax numbers by porting them to eGoldFax
- New toll-free fax numbers included at no extra charge (quantity dependent on plan)
- Additional fax numbers available if desired
- Save $40/month or more per traditional telephone fax line eliminated
- No long distance fees (to USA, Canada)
- Flexible monthly service avoids upfront costs and long-term contracts
- Take advantage of the built-in cloud capability of your Sharp OSA device!

With no software to download or install, eGoldFax is simple and quick to set up using either the Sharp MFP touch panel or the MFP's web interface

Easy Faxing with eGoldFax

Outbound Faxing

eGoldFax enables unlimited users to fax documents directly from your MFP, computer or smart device.

Fax Paper Documents from Sharp MFPs

- Select eGoldFax from the MFP touch panel
- Enter a fax number or select contacts from eGoldFax phonebooks
- Enter your email to receive a notification of fax status (optional)
- Press Go

Fax Paper Documents from Scan-to-Email MFPs

- Select the "scan to email" feature
- For email address, in the TO field enter faxnumber@egoldfax.com
- Scan the document

Fax Digital Documents from Computers and Smart Phones

- Address a standard email message TO: "faxnumber@egoldfax.com". The subject and message text will be presented on the fax cover sheet.
- Attach documents to be faxed (Word, Excel, PDF, TIFF, JPG or BMP) to the email
- Press "Send." You'll receive a fax status notification via email

Inbound Faxes

- Existing fax numbers are ported to eGoldFax, and if desired, eGoldFax can provide additional fax numbers
- You associate each of your fax numbers to one or more email addresses. You can set up faxes to be routed to individuals, departments, business process workflows, or to MFP devices for auto-print
- eGoldFax routes each inbound fax to your designated email destination as a PDF attachment

my.eGoldFax.com Portal

The eGoldFax service includes your own portal where you can:
- Manage your account, address book and user list
- View fax activity, register MFPs, and manage inbound fax routing
- Request additional fax numbers and more

eGoldFax Pure Cloud vs. Traditional Faxing

Traditional fax solutions require on-site server hardware and software as well as fax-specific hardware and software. Additionally, typically a connection must be made through the on-site telephone system for direct inward dial fax routing, usually requiring support from your telephone system integrator.

With the pure cloud fax service from eGoldFax, you don't need to purchase or install any on-site fax hardware or software. You won't need to deal with telephone integration headaches, either.

With eGoldFax, faxing is easy and inexpensive!

Requirements
- Sharp OSA 4x cloud-ready MFPs with Application Communication Module MX-AMX2; or any MFP with scan-to-email feature
- Email service and internet access
- The fax-from-email feature requires a unique company email domain; or, provide authorized email sender addresses
- Optional Sharp email print feature and PostScript support required for auto-print of received faxes
